

The removal of Section A on the Food and Distribution portion is something I myself is strongly against as well as many of the population in Simon Sanchez. Having a cap on the number of activities is plausible, but the removal of fundraising activities with food is completely absurd.

Coming from my perspective as well as the students, it has been obvious that the community is against this. We understand this is for the students to be healthier but it has been proven that certain amounts of consumption that do not follow the healthy food guidelines is no harm in moderation.

Removing this removes the aspect of a thrilling school life and enjoyment. It may be for just raising funds to purchase items for clubs and classes or just a gathering of the school, either way it would negatively impact the students social aspect.

I appreciate the considerations and opinions shared among this BP.

On behalf of the Simon Sanchez community,
Shynez Alcairo IBOGS
